

NANGA

———— WELCOME TO ————

# N A G A

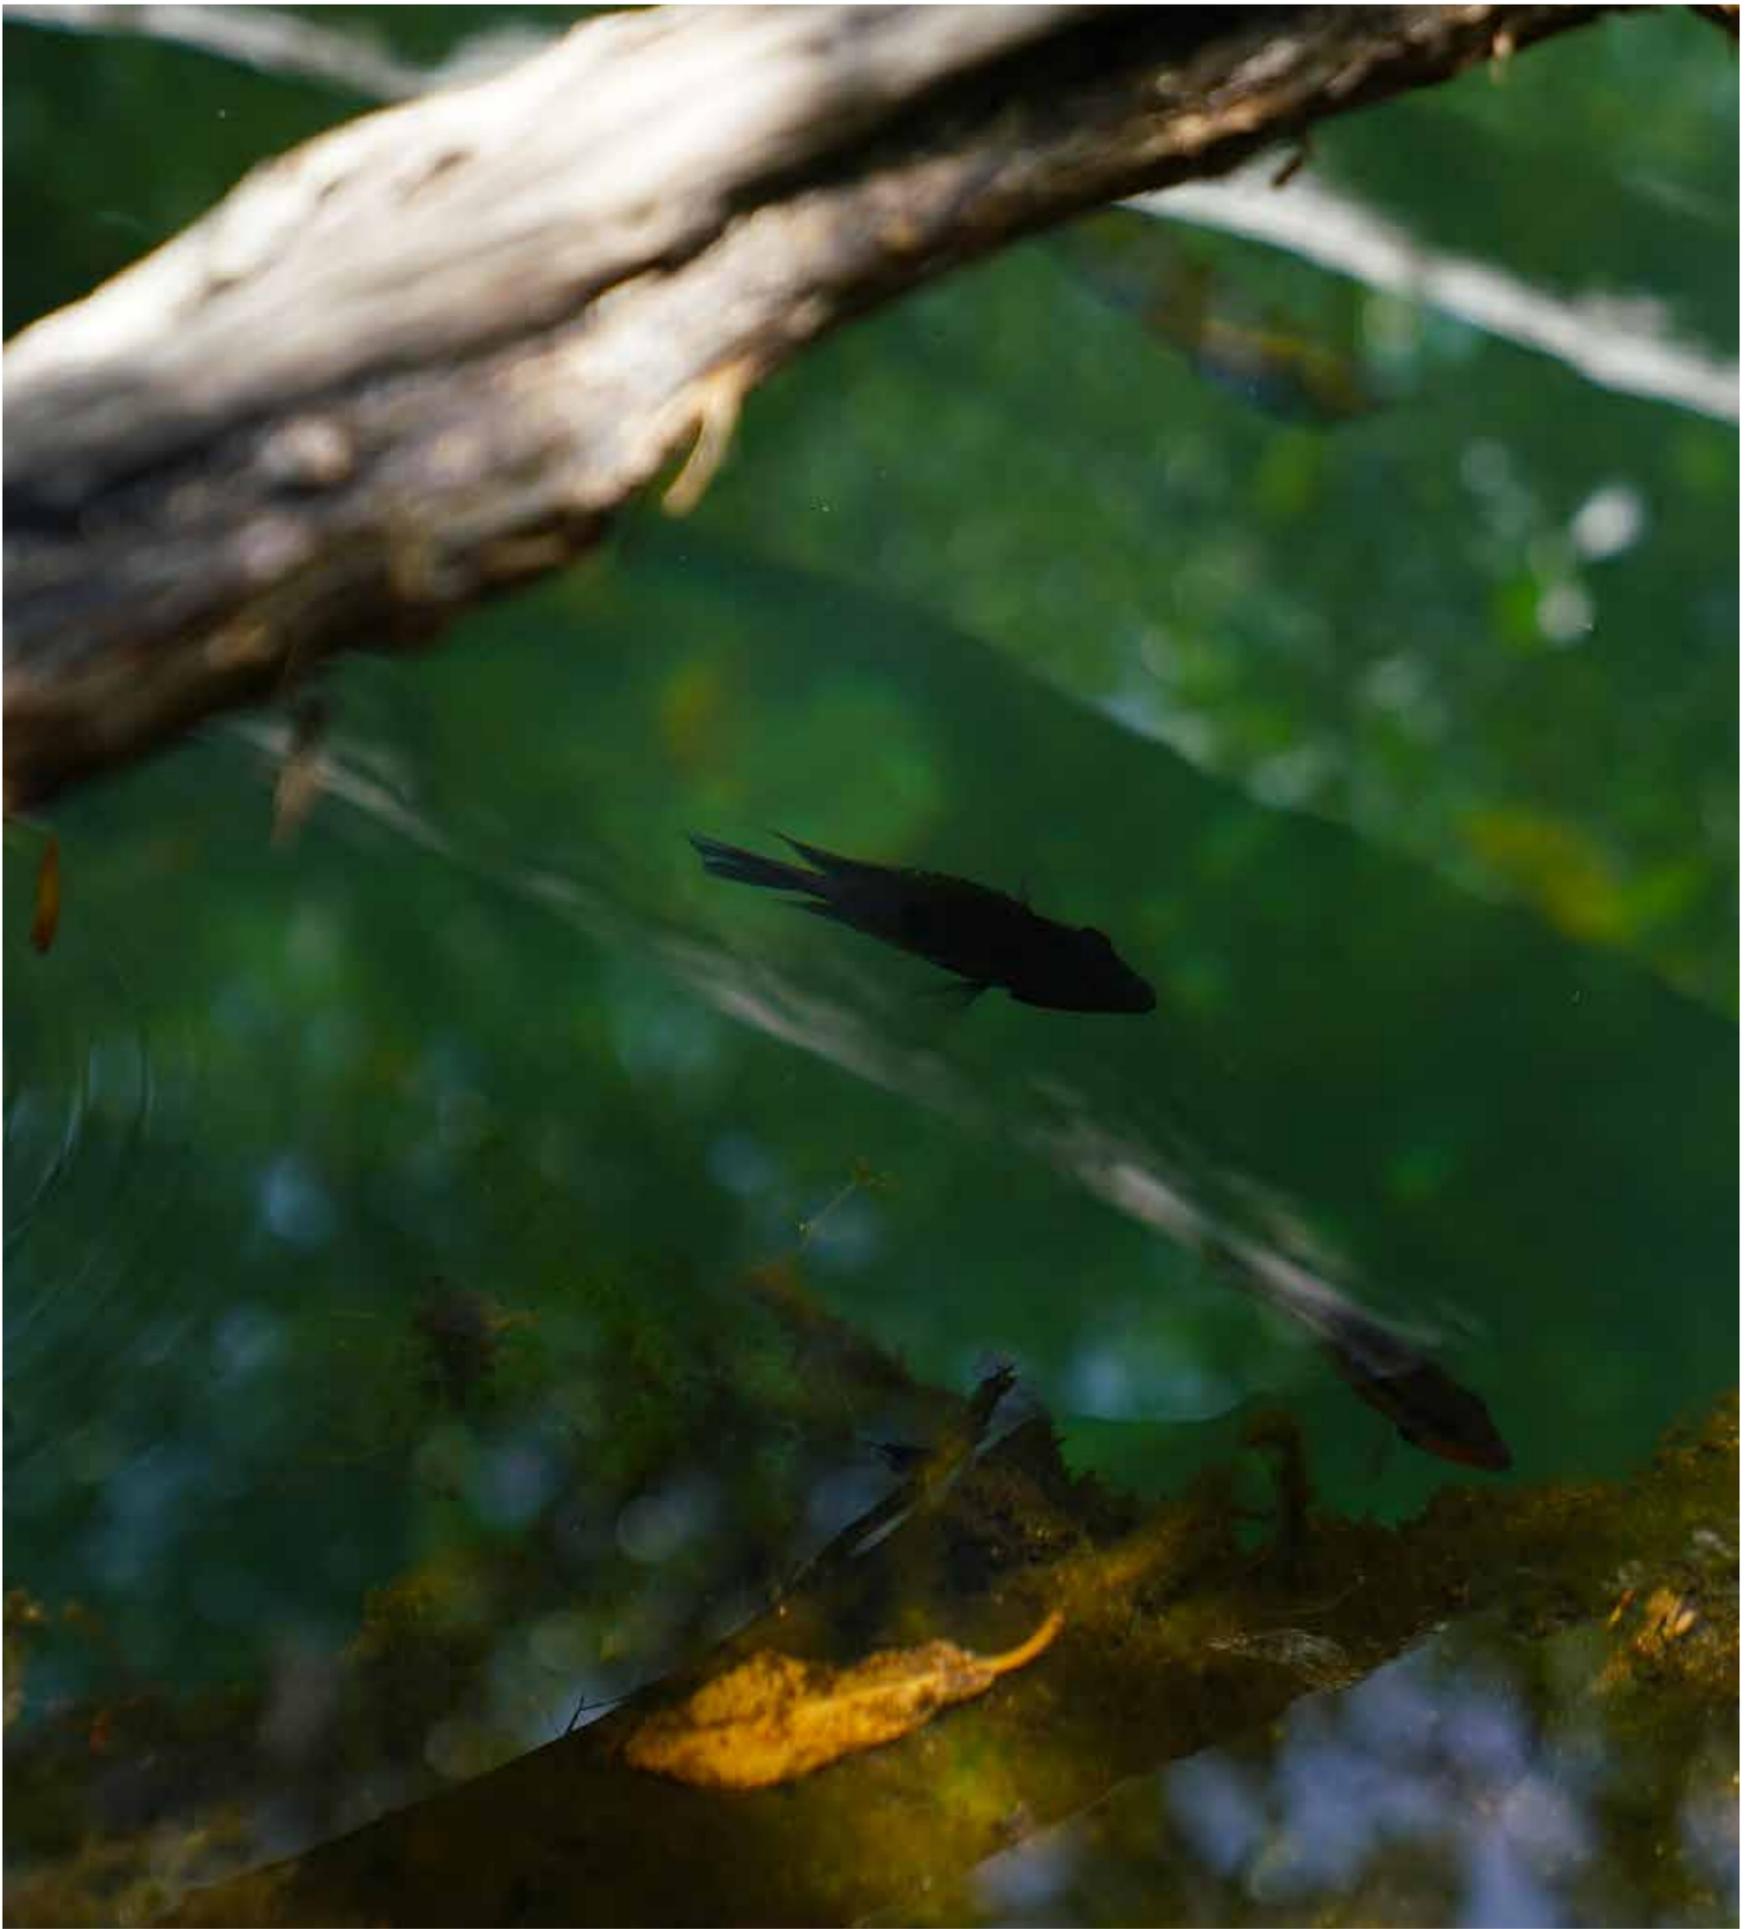

A wild and luxurious Haven centered in the very heart of Tulum Beach and the Sian Ka'an Biosphere Reserve. A Sacred Ground where you can exhale and return to your true self while being nurtured in the pristine embrace of Nature.

The Naga Residence is rooted amidst expansive native mangrove forests and its vast domain includes three natural, wild and private Cenotes whose magical healing waters gently restore our original innocence.

This sanctuary itself is intentionally designed to balance and harmonize body, mind and spirit by immersing you graciously in the transfiguring elements of nature.

Hand crafted in an enchanting and whimsical Caribbean style, the Naga Residence is made of 95% local woods, and sources its electricity from the sun. Each of its suites is graciously appointed with rich textiles and furnishings created by artisans from different corners of the world.

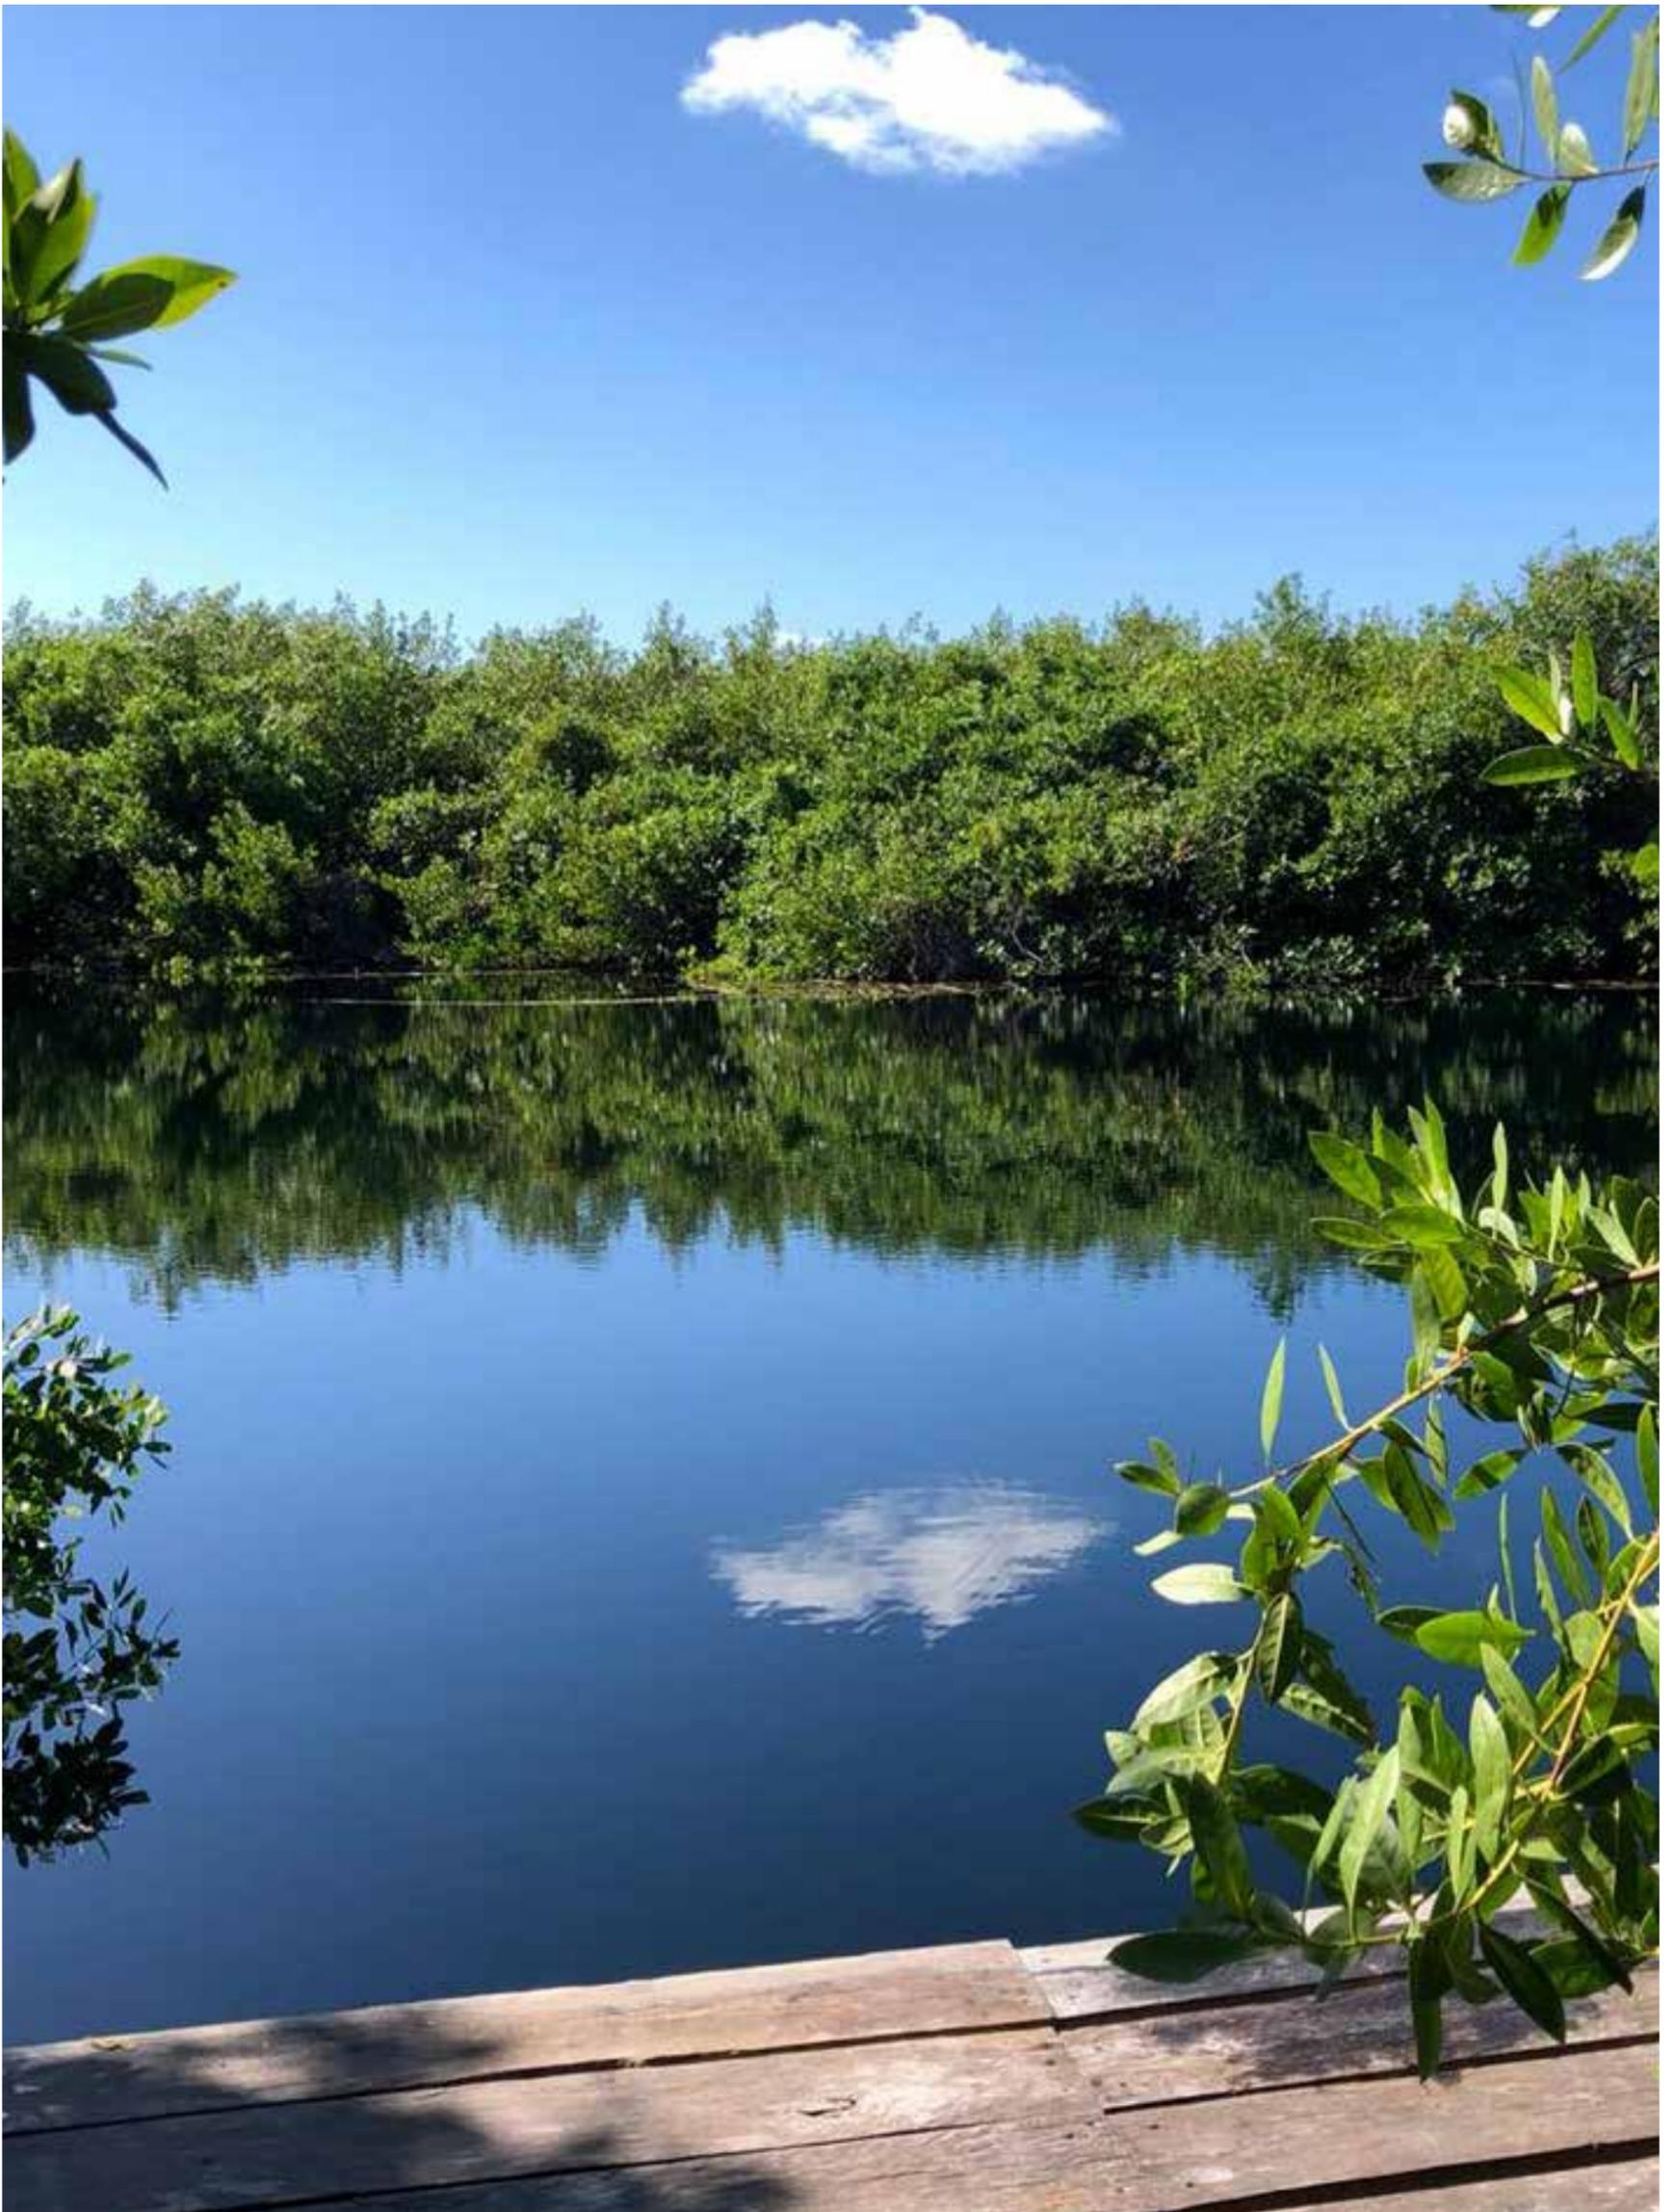

In a heavily touristed place such as Tulum where many hotels neglect the Earth, the Naga Residence is a welcome respite from the hype and is instead a refined Oasis built to respect and revere Nature Herself.

As guardians devoted to this sacred land, we invite you with pleasure into the loving arms of this luxury boutique guesthouse and the blessed wilderness that surrounds it. We know that you will find a profound peace and magical energy here that empowers you to awaken your spirit, expand your consciousness, come into right relationship with nature, and cultivate a profound connection with your true self.

At the edge of the Naga Residence you will find the secret entrance to Nagalaya, a vast natural ecosystem of mangroves and pure natural waters. This is a privileged experience that only the Naga Residence can offer its guests. As your mystical journey begins, we invite you into noble silence as you breathe deeply and proceed with great care and reverence as you slowly enter the mystery.

As you explore the jungle path you will delight upon our three pristine private Cenotes. These powerful Aquifers are rich with minerals and purifying energy, and will gently help you cleanse, relax and heal on all levels. Take an unforgettable bath in these crystalline waters as the sun and clouds paint the vast landscape with astonishing colors.
